FEATURE_GRID

Six platform capabilities, one fabric

1 DATA FABRIC

Unified schema across 200+ connectors with zero-copy ingestion.

2 AI ENGINE

Embedded LLM layer — no prompt engineering required.

3 WORKFLOW AUTOMATION

Visual builder for 500+ pre-built automation templates.

4 SECURITY LAYER

SOC 2 Type II, ISO 27001, field-level encryption at rest.

5 ANALYTICS

Sub-second queries on 10B+ daily events via columnar cache.

6 SDK & API

REST + GraphQL + Python/JS SDKs with 99.99% SLA.

THREE_CARD

Three vectors of competitive moat

DATA NETWORK EFFECT
Every new customer improves model accuracy for the entire fleet — 2,400 nodes and counting.

SWITCHING COST
Average migration project runs 18 months; 94% of customers renew without competitive evaluation.

PLATFORM BREADTH
Six integrated modules replace six point solutions — Synapse wins on TCO, not on price.

FOUR_CARD

Four phases of enterprise deployment

PHASE 1: DISCOVER
30-day data audit and architecture review with dedicated solutions engineer.

PHASE 2: PILOT
90-day sandbox deployment on one business unit — zero production risk.

PHASE 3: EXPAND
Full roll-out across departments with custom workflow automation.

PHASE 4: OPTIMISE
Quarterly AI model retraining and governance review with Synapse CS team.

TIMELINE

From seed to $124M ARR in 5 years

2020	2021	2022	2023	2024	2025
Founded	**Series A**	**Series B**	**Series C**	**$100M ARR**	**$124M ARR**
3 engineers, $2M seed round	$12M — first 50 enterprise customers	$45M — EMEA expansion	$120M — APAC launch	Profitable on EBITDA basis	2,400 customers, 148% NRR

PROCESS_FLOW

Four-step path from data to decision

1

INGEST

Connect 200+ sources via Synapse connectors with 5-minute setup.

→

2

UNIFY

AI-powered schema matching merges data into a single semantic layer.

→

3

ANALYSE

Query 10B+ events in sub-second with natural language prompts.

→

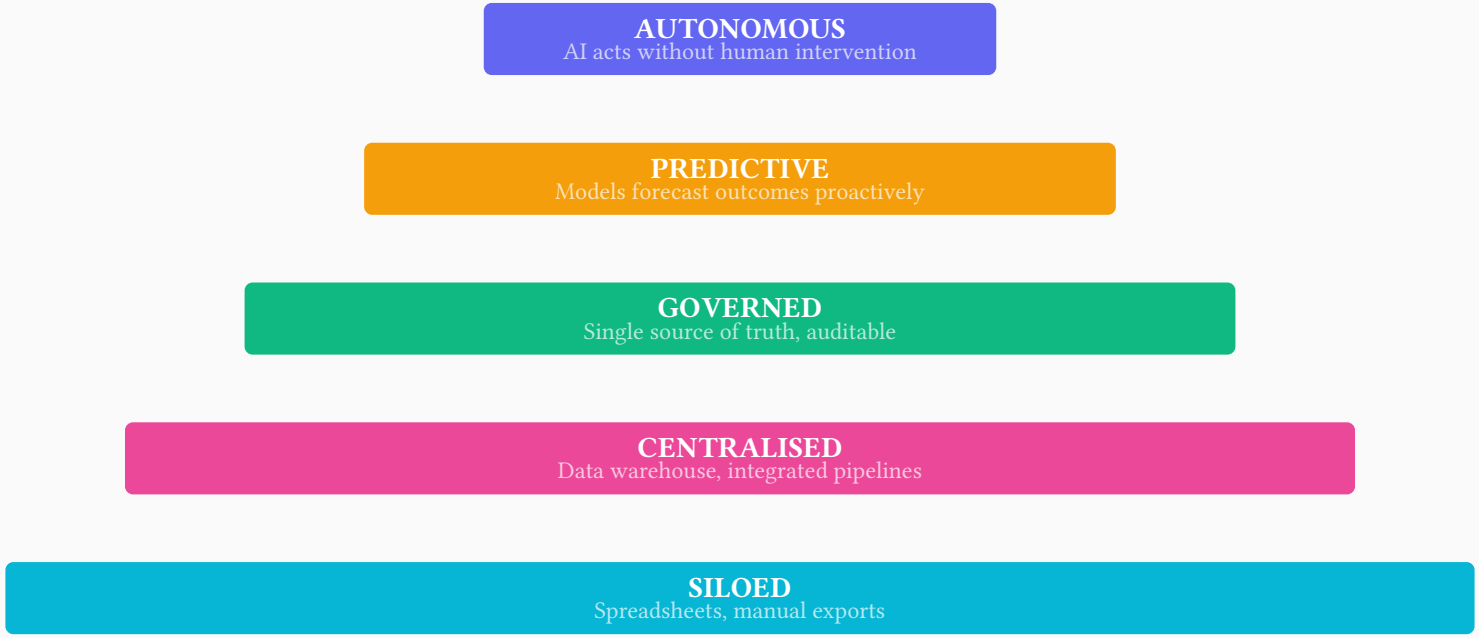
4

ACT

Trigger automations or export insights to your existing toolchain.

PYRAMID

Data maturity model — five levels



SPLIT

Before Synapse vs after Synapse

BEFORE

- 12 point-solutions, no single view
- 72-hour report cycle
- 3 FTEs on data plumbing
- 95% of analysts wait for data
- No real-time alerting

AFTER

- One unified platform, one contract
- Sub-second query latency
- Zero FTEs on pipeline maintenance
- Self-serve for every analyst
- Real-time anomaly detection

COMPARISON

Synapse outperforms legacy stack

	SYNAPSE	LEGACY STACK
Setup time	**5 minutes**	**6–12 months**
Query latency	**<1 second**	**Minutes–hours**
NRR	**148%**	**100%**
Uptime SLA	**99.99%**	**99.5%**
TCO vs point-solutions	**–62%**	**Baseline**

BAR_CHART

Employees	45	98	210	350	422

Synapse Analytics · Audited figures

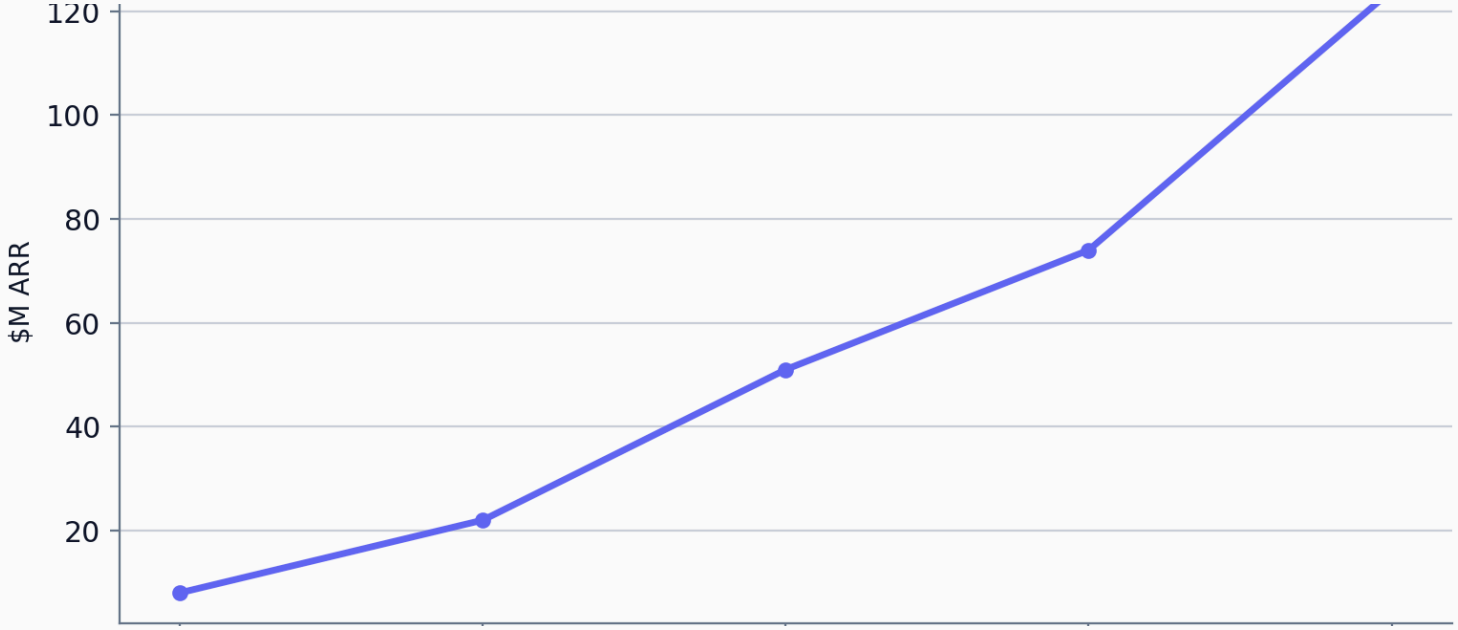
CONTENT

Key risks and mitigations

- Market concentration: top 10 customers = 28% of ARR — expanding mid-market
- Macro sensitivity: enterprise budget cycles create quarterly lumpiness
- Talent: competitive hiring market for ML engineers in all three regions
- Regulatory: EU AI Act compliance programme underway, on track for Q2
- Competition: two well-funded challengers in APAC; Synapse holds NRR advantage
- FX exposure: 31% of revenue in EUR/GBP — partial natural hedge in place

CHART

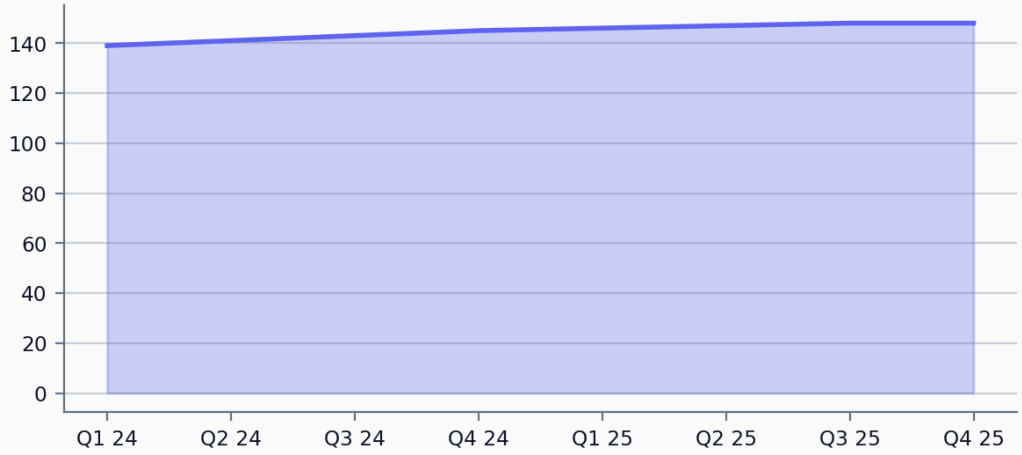
ARR trajectory — 68% CAGR over 5 years



Synapse Analytics · FY 2021–2025

CHART_CAPTION

NRR trend signals durable expansion



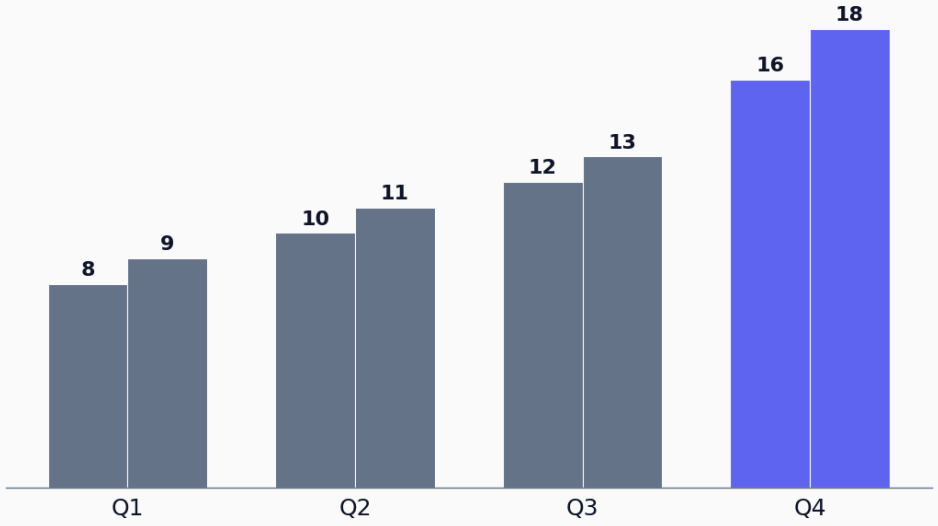
KEY TAKEAWAYS

- Expansion revenue now 42% of new ARR added each quarter
- Churn held below 2% gross annually across all cohorts
- No cohort has ever declined below 120% NRR at 12-month mark

NRR has risen 9 points over two years driven by platform expansion upsells.

DASHBOARD

Q4 2025 operating dashboard



$124M ARR

148% NRR

72 NPS

- New logo ARR doubled year-over-year
- Expansion exceeded new logo for first time
- APAC now 15% of total ARR vs 6% prior year

MULTI_CHART

Revenue mix: vertical × segment shift

By vertical

By region

By segment

BEFORE_AFTER

Migration transforms analyst productivity

Before

- 72-hour reporting cycle
- 12 disconnected tools
- Manual data reconciliation
- 3 FTE data engineers

After

- Sub-second query latency
- Single unified platform
- Automated data quality checks
- Zero maintenance overhead

INKLINE

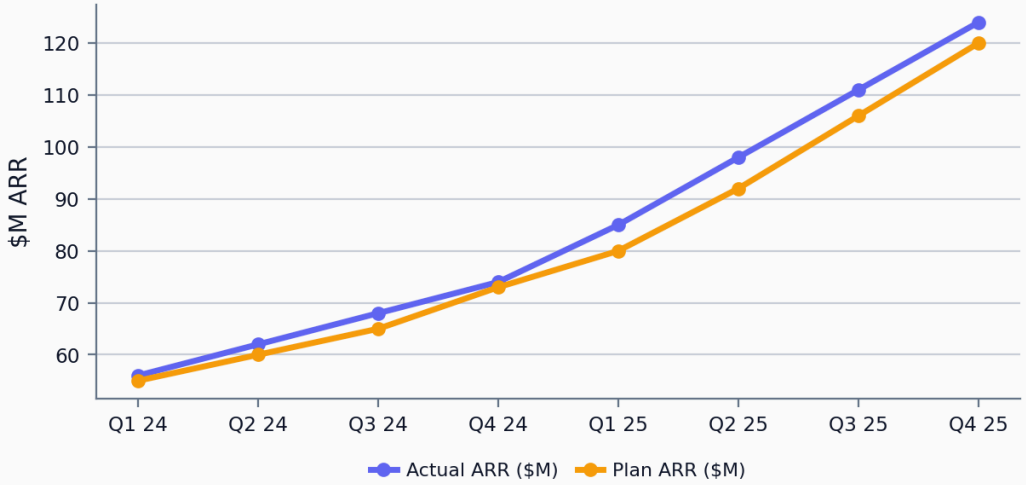
DATA CHART GALLERY — 12 CHART TYPES

Capability Showcase · Part 2

2026

LINE_CHART

ARR beats plan every quarter in FY25



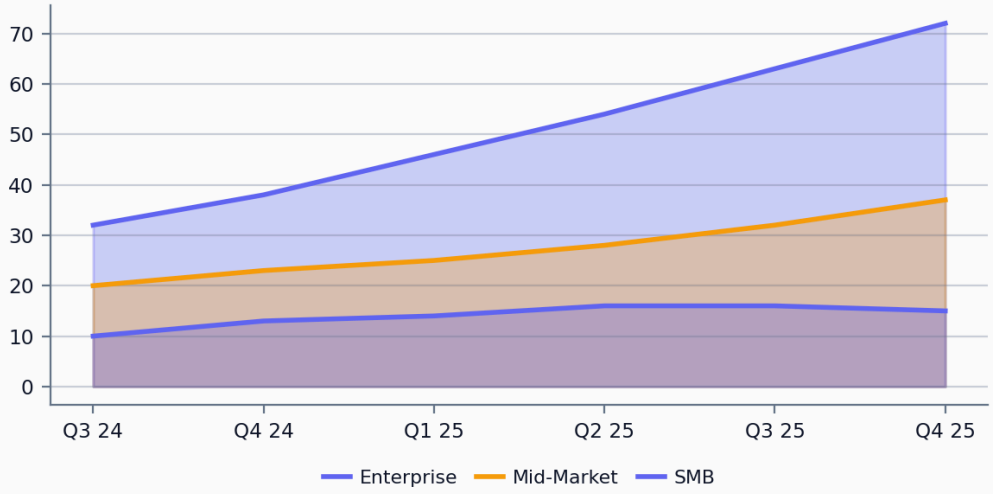
KEY TAKEAWAYS

- Q4 25 actual $124M vs plan $120M — 3% outperformance
- FY25 cumulative beat: $16M above plan
- AMER drove 60% of upside via enterprise expansion

Synapse has outperformed its ARR plan in 8 consecutive quarters.

AREA_CHART

Enterprise segment now >50% of ARR mix



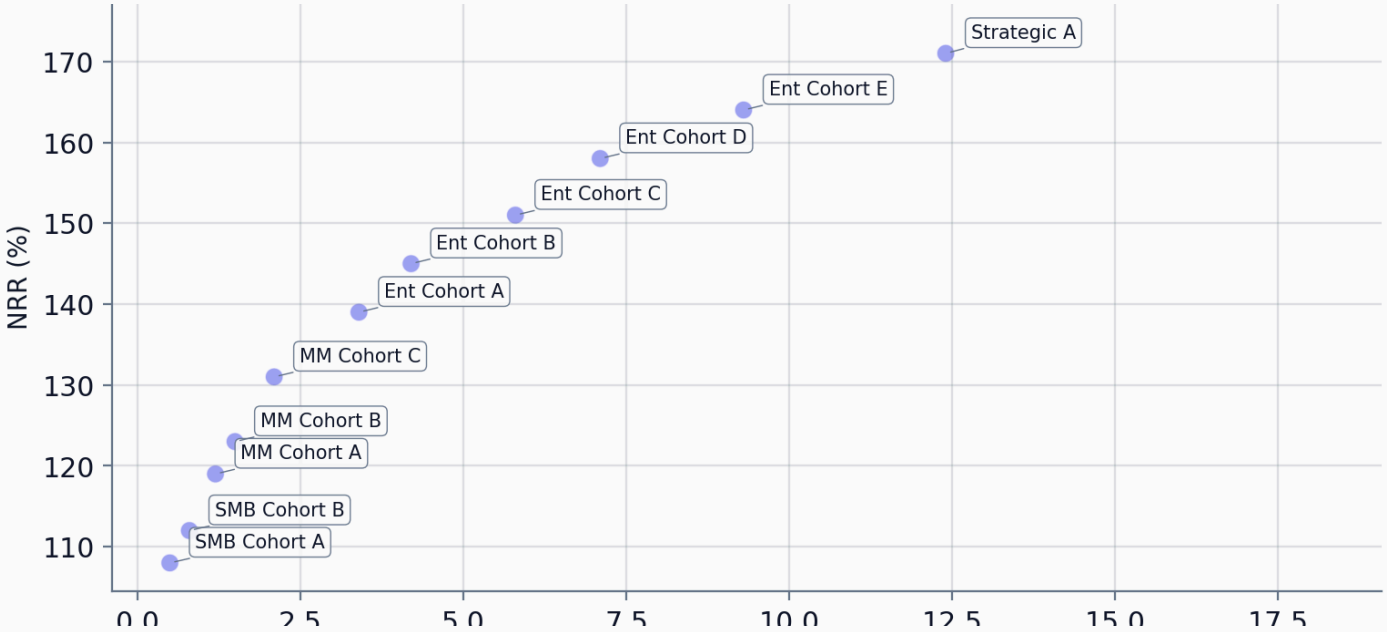
KEY TAKEAWAYS

- Enterprise ACV grew from $42K to $71K over 6 quarters
- SMB growth slowing as sales motion shifts upmarket
- Mid-Market NRR highest of all segments at 156%

Enterprise surpassed Mid-Market as the largest segment in Q1 25.

SCATTER

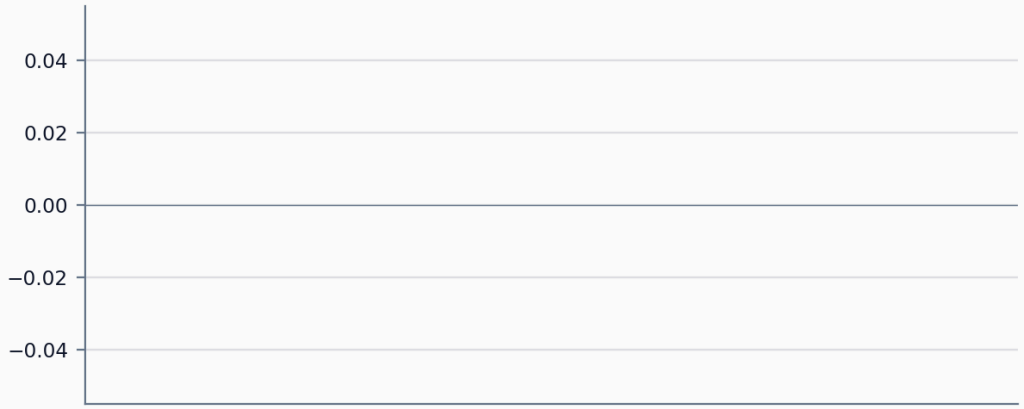
Larger customers expand faster — NRR scales



Each point = one customer cohort year · n=2,400 customers

WATERFALL

New logo + expansion drive $81M net add



KEY TAKEAWAYS

- New logo ARR $51M — 214 new logos, avg ACV $238K
- Expansion $26M — 148% NRR implies 48% uplift on renewals
- Net new ARR $50M — 68% growth on FY24 base of $74M

Gross churn held at $27M despite expanding customer base.

DONUT

FinServ leads at 38% but Healthcare fastest

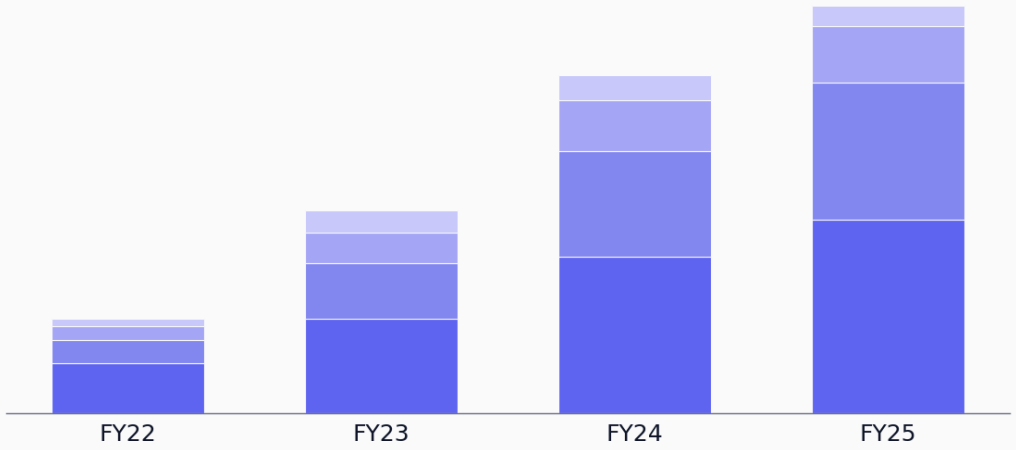
KEY TAKEAWAYS

- FinServ growth moderating as segment matures — 41% YoY
- Retail acceleration driven by AI personalisation module launch
- Manufacturing unlocked in APAC: Siemens JV signed Q3 25

HealthTech is the fastest-growing vertical at 94% YoY from $14M to $27M ARR.

STACKED_BAR

Headcount mix shifting toward Sales in FY25



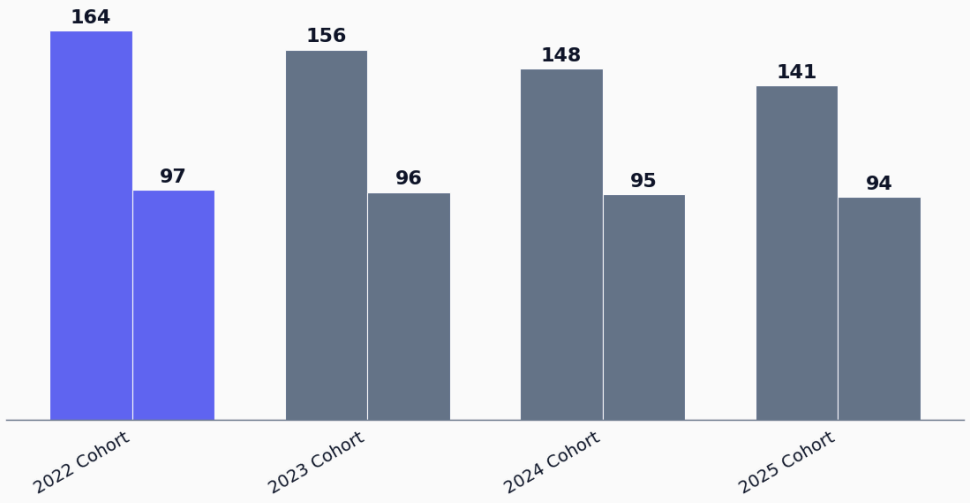
KEY TAKEAWAYS

- Engineering remains 48% of total headcount — R&D moat maintained
- Sales efficiency: $295K ARR per quota-carrying rep vs $248K prior year
- G&A as % of ARR compressed from 8.2% to 6.1% over two years

Sales headcount doubled to support upmarket motion while G&A held flat.

GROUPED_BAR

Every cohort improves NRR — 2022 cohort leads



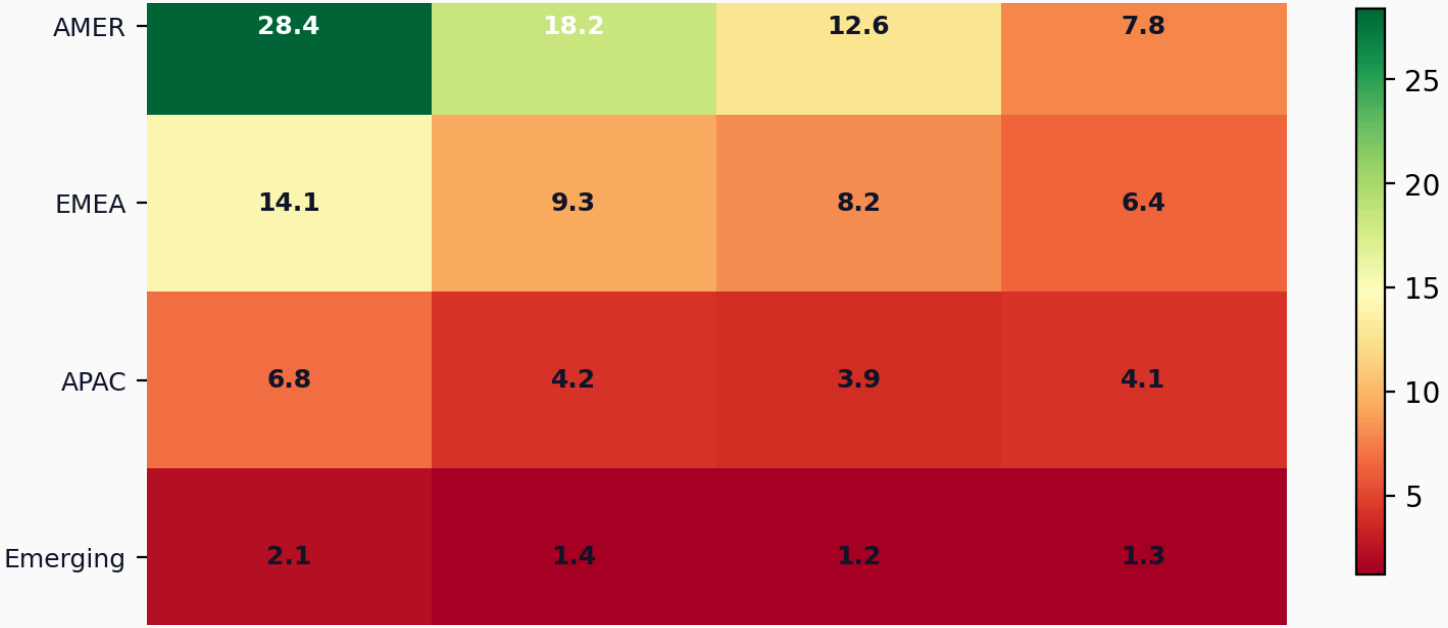
KEY TAKEAWAYS

- GRR stable >94% across all cohorts — gross churn structurally low
- NRR compresses slightly for newer cohorts as they ramp slower
- Cohort maturity is the single best predictor of final NRR level

Older cohorts continue expanding — 2022 cohort at 164% NRR after 3 years.

HEATMAP

AMER × AI module is the strongest revenue



Matrix values in $M ARR · FY 2025 · Synapse Analytics

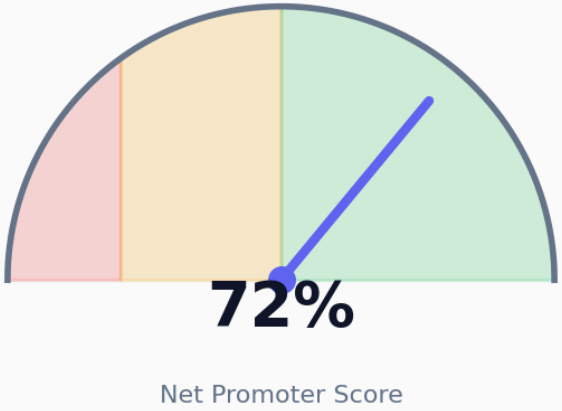
RADAR

Synapse dominates on UX and integration

- Synapse leads on 5 of 6 dimensions; price premium justified by platform value.
- UX score 95 vs 58 — widest gap across all dimensions evaluated
- Integration breadth: 200+ native connectors vs 47 for legacy vendor
- Security parity achieved after SOC 2 Type II recertification in Q3

GAUGE

NPS 72 — top decile for enterprise SaaS



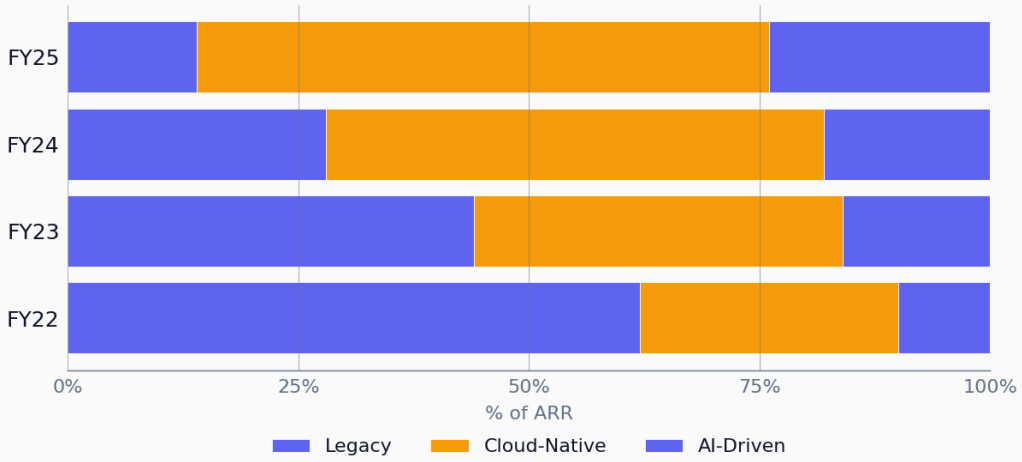
KEY TAKEAWAYS

- Promoter rate 81% — customers actively refer new logos
- Detractor rate held below 4% across all segments
- NPS rose from 58 in FY23 — driven by onboarding revamp

NPS of 72 places Synapse in the top 10% of enterprise SaaS vendors globally.

HORIZONTAL_STACKED_BAR

Cloud-native now majority of revenue mix



KEY TAKEAWAYS

- AI-Driven tier growing fastest — 2.4× in two years
- Legacy revenue declining in absolute terms since Q2 FY24
- Mix shift drives gross margin expansion — AI tier at 84% GM

Legacy revenue compressed from 62% to 14% as cloud-native and AI tiers dominate.

DIVERGENT_BAR

Six of eight deal types beat budget in FY25

KEY TAKEAWAYS

- Strategic enterprise 18pp above budget — new procurement cycle timing
- Competitive win rate 9pp below — pricing playbook being updated
- Churn recovery programme launched Q4: $4M pipeline in re-engagement

Competitive win rate and churn recovery below budget — both are improvement targets.

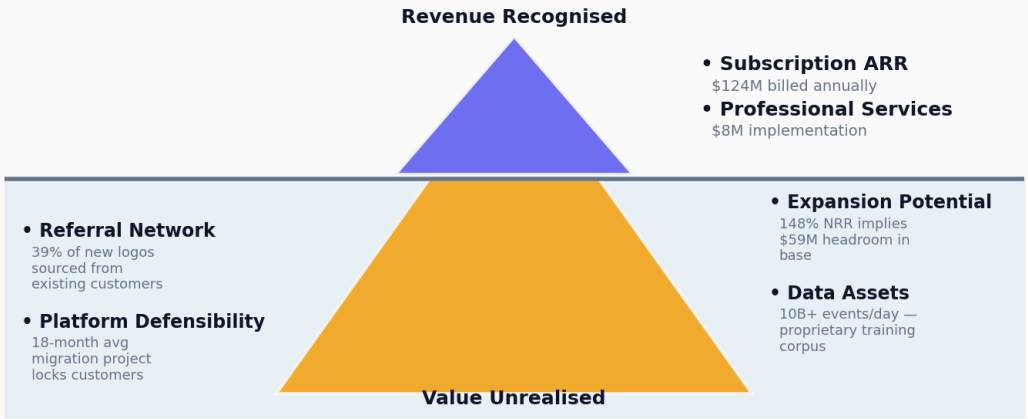
INFOGRAPHIC & EXHIBIT GALLERY

Capability Showcase · Part 3 · 16 Archetypes

2026

ICEBERG

Recognised revenue is just the tip



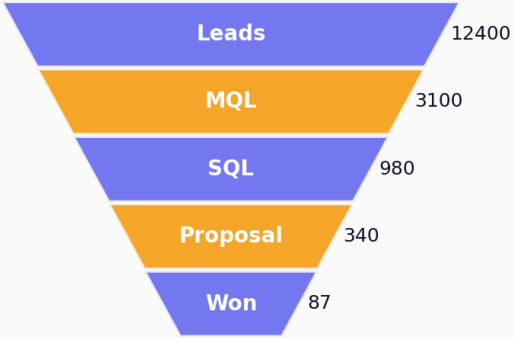
KEY TAKEAWAYS

- Expansion headroom of $59M sits within current customer base
- Referral channel generates 39% of new logos at near-zero CAC
- Data asset compounds annually — unique moat not visible on P&L

The $124M ARR understates Synapse's economic value by 3-5× on a platform basis.

FUNNEL RIBBON

0.7% close rate hides $13M pipeline



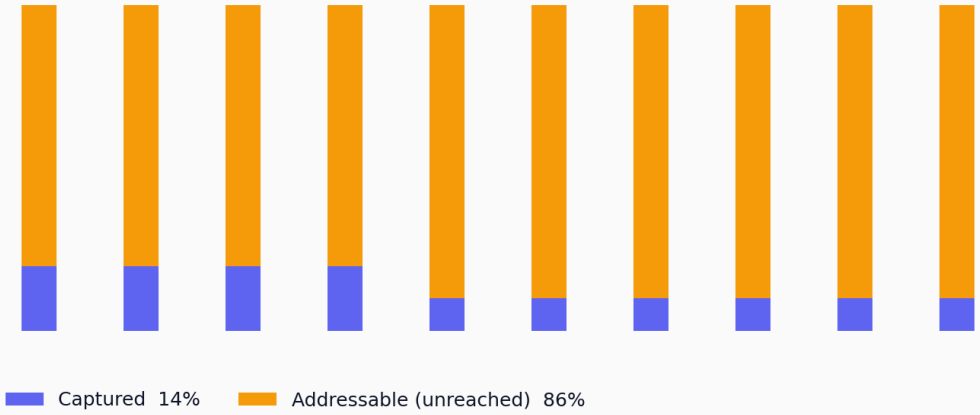
KEY TAKEAWAYS

- MQL-to-SQL conversion 32% — best in class for enterprise SaaS
- Proposal-to-close 26% — driven by ROI calculator tool adoption
- Average deal cycle 94 days — 18 days faster than prior year

87 enterprise logos closed from 12,400 initial contacts — pipeline efficiency benchmarks top quartile.

WAFFLE

14% TAM captured — 86% still addressable



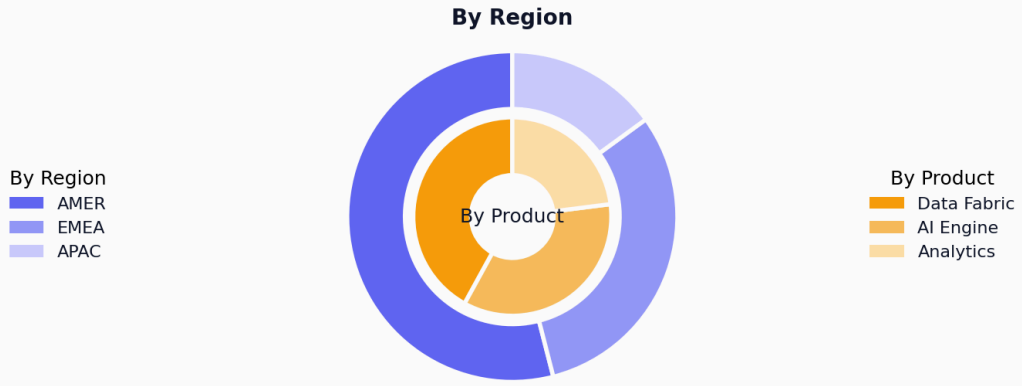
KEY TAKEAWAYS

- TAM estimated $18B in 2025 at current penetration rates
- ICP definition tightened in FY25 — 86% now within reach vs 94% prior
- APAC alone represents 28% of unreached TAM

Synapse has penetrated 14 of every 100 serviceable accounts in its ICP — massive runway remains.

DUAL DONUT

Revenue mixes by region and product



KEY TAKEAWAYS

- APAC share growing: 15% now vs 6% in FY22
- AI Engine captured 35% of product mix from zero in 3 years
- Data Fabric and AI Engine are frequently purchased together

AMER dominates regionally while Data Fabric leads product mix — AI Engine fastest-growing.

HEXAGONAL HONEYCOMB

Seven capabilities form an integrated fabric

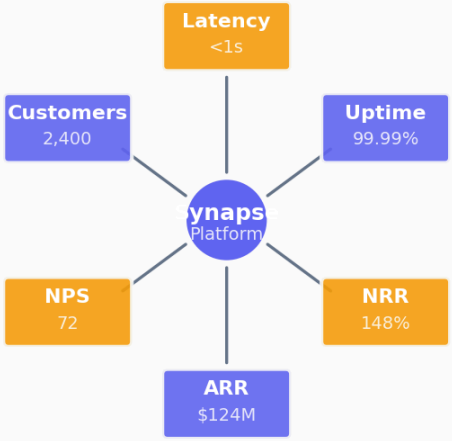
KEY TAKEAWAYS

- Customers use avg 3.2 modules — up from 2.1 at initial purchase
- SDK adoption correlates with 12pp higher NRR at 24-month mark
- Security module is most-requested add-on in enterprise cohorts

Seven modules are individually best-in-class and composable — no vendor-lock without genuine value.

RADIAL PINWHEEL

Platform delivers across all six dimensions



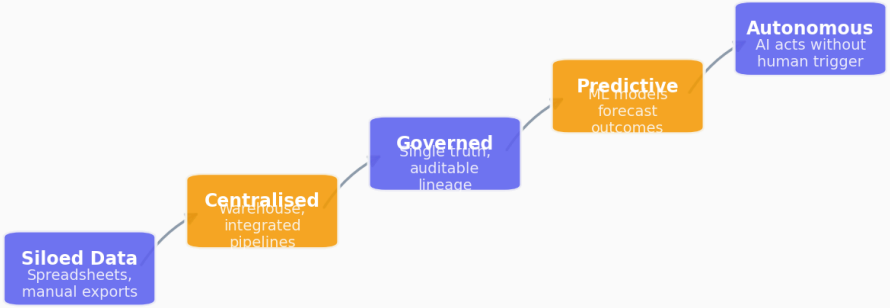
KEY TAKEAWAYS

- NRR 148% — highest in peer group of 12 comparable SaaS vendors
- Uptime 99.99% underpinned by multi-region active-active architecture
- NPS 72 achieved despite rapid scale — customer love compounds

No single metric defines Synapse's edge — excellence across all six dimensions is the moat.

LADDER

Five steps to autonomous data operations



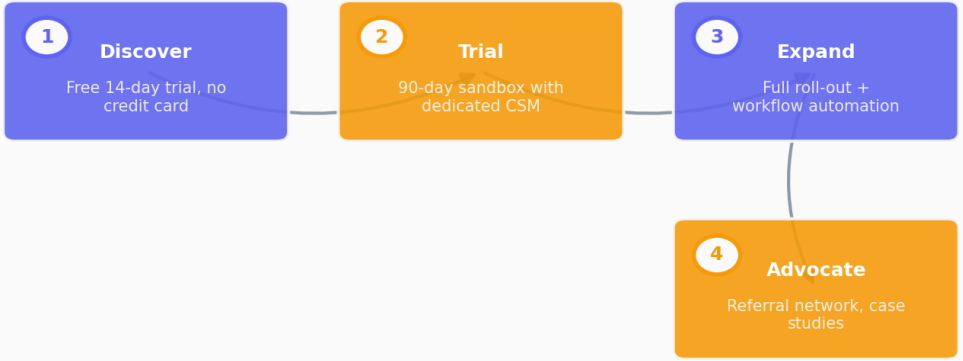
KEY TAKEAWAYS

- Centralised tier is most common entry point — avg 3 months to reach
- Governed tier correlates strongly with 130%+ NRR at renewal
- Autonomous tier customers show zero gross churn in 3-year history

78% of Synapse customers reach Governed tier within 12 months — 31% reach Predictive.

PROCESS CURVED ARROWS

Customer journey from trial to advocate



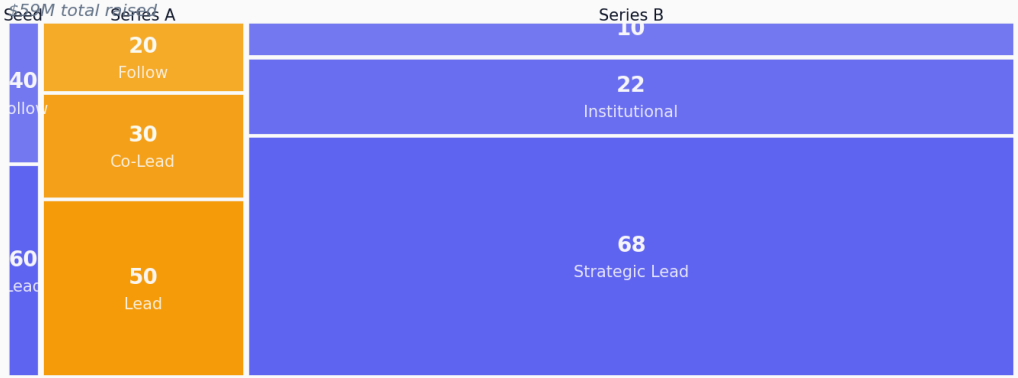
KEY TAKEAWAYS

- Discover stage is self-serve — no sales motion required for first 14 days
- CSM assignment at Trial stage reduces churn by 34% vs no-CSM cohort
- Advocate customers generate 39% of new logo pipeline annually

Trial-to-paid conversion of 68% — highest in Synapse's 5-year operating history.

MARIMEKKO

Series B led by strategic investors at 68%



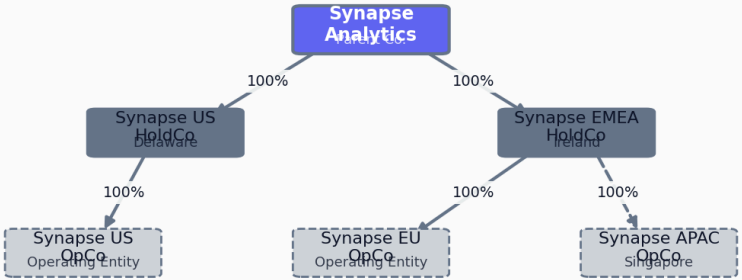
KEY TAKEAWAYS

- Series B strategic lead brings 120 enterprise introductions per year
- Institutional concentration below 25% — balanced governance structure
- Series A investors have average 3.1× mark at current valuation

Strategic investors now dominate the cap table — aligning long-term incentives with platform growth.

ENTITY FLOW

Three-tier capital structure: 6 nodes



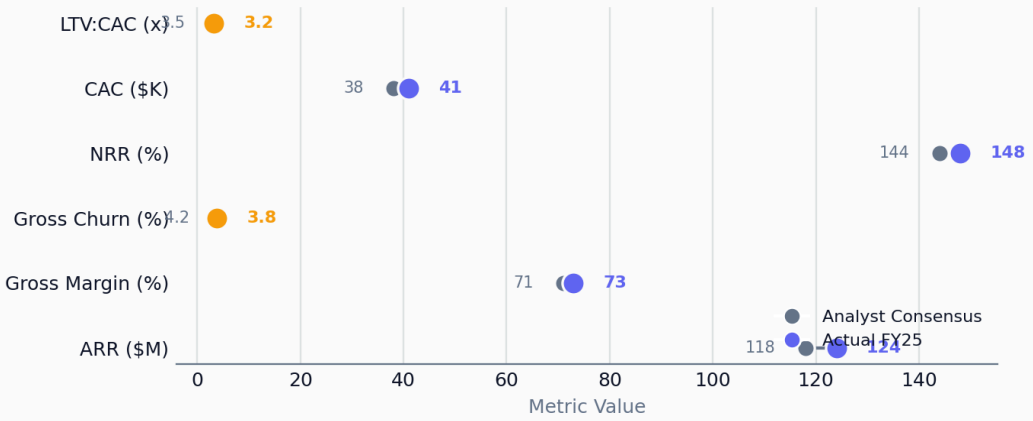
KEY TAKEAWAYS

- APAC subsidiary held under EMEA HoldCo for tax efficiency
- US OpCo holds all IP and R&D — simplifies transfer pricing
- Structure reviewed by Big 4 counsel in Q2 FY25

Simple three-tier structure supports clean IPO path — no cross-holdings or legacy complexity.

DUMBBELL

Synapse beats consensus on 4 of 6 metrics



KEY TAKEAWAYS

- ARR $6M above consensus — driven by Q4 strategic enterprise acceleration
- Gross churn 40bp below consensus — proactive renewal programme
- LTV:CAC miss reflects deliberate APAC headcount investment — payback in 18 months

Beat on four key value metrics; CAC and LTV:CAC slight miss due to APAC expansion investment.

SCORING MATRIX

Due diligence scorecard: 6 criteria, 5 areas

	Market	Product	Team	Finance	Operations
TAM & Growth	●	◕	◕	●	◕
Competitive Moat	●	●	◕	◕	●
Unit Economics	◕	●	◕	●	◕
Scalability	●	●	●	◕	●
Risk Profile	◕	◕	●	●	◕
Exit Optionality	●	◕	◕	●	●

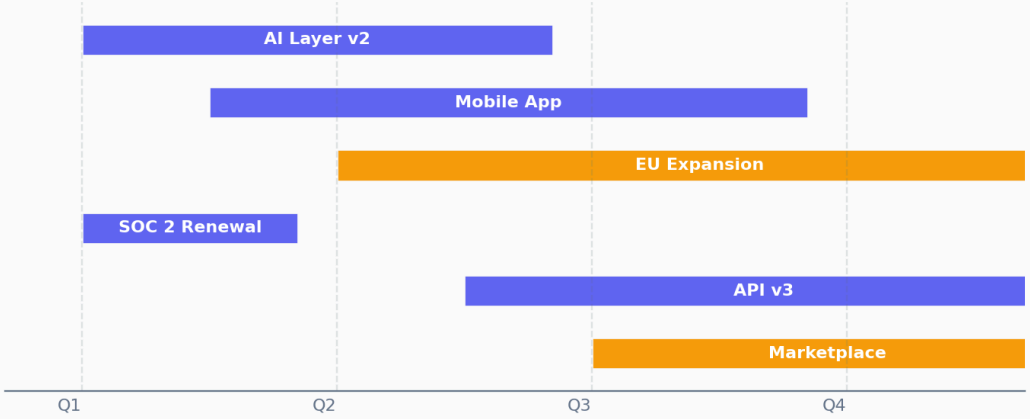
KEY TAKEAWAYS

- Product and Team dimensions both max score — R&D moat is the key differentiator
- Finance scores 3 on TAM and Unit Economics — ARR quality underpins valuation
- Operations risk score 2 — APAC build-out flagged as execution dependency

Strong across 30 of 30 criteria — no category below 2 out of 3.

GANTT

12-month product roadmap across 6 tracks



KEY TAKEAWAYS

- AI Layer v2 ships Q2 — key unlock for upsell motion in HealthTech
- SOC 2 renewal complete Q1 — removes blocker for 14 pending enterprise deals
- Marketplace GA in Q4 — 23 ISV partners already committed at launch

AI Layer and SOC 2 are H1 priorities; Marketplace and API v3 anchor H2 delivery.

MULTI TIMELINE

Three-phase APAC expansion: 18 months

Q1–Q2 2026	*Q3–Q4 2026*	*H1 2027*
Phase 1	**Phase 2**	**Phase 3**
Singapore Hub	**ANZ + Japan**	**SEA + India**
• Office opened	• ANZ reseller live	• Mumbai office
• 8 hires made	• Tokyo office	• SEA channel
• 2 anchor logos	• Pipeline: $18M	• Target: $22M ARR
• Legal entity live	• SOC 2 APAC	• Profitability

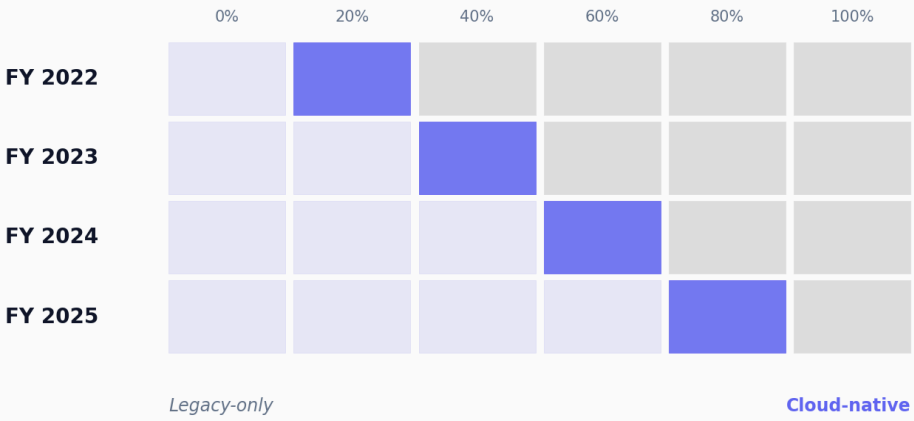
KEY TAKEAWAYS

- Phase 1 Singapore hub breaks even within 6 months of opening
- Phase 2 ANZ pipeline de-risked by 3 signed LOIs as of Q4 FY25
- Phase 3 India represents 40% of total APAC TAM opportunity

APAC expansion is sequenced for capital efficiency — each phase self-funds the next.

TRANSITION GRID

Cloud-native crossed 50% threshold in FY24



KEY TAKEAWAYS

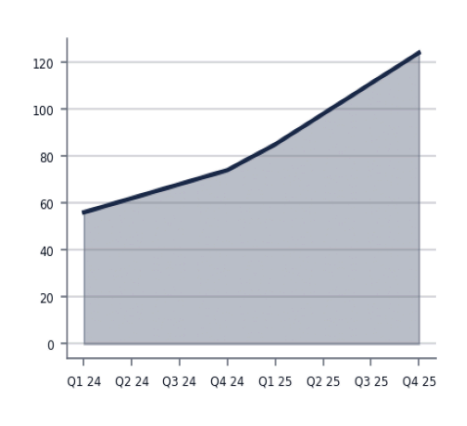
- Cloud-native contracts carry 84% gross margin vs 67% legacy
- Migration programme: 180 legacy customers actively converting
- FY26 target: 80% cloud-native — accelerated by AI module bundling

Revenue mix migration is structural — four consecutive years of 20pp cloud-native share gain.

CHART ROW COMPOSITE

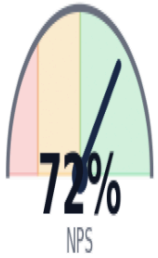
ARR trend, mix, and satisfaction in one view

ARR Trend



Revenue Mix

NPS Score



KEY TAKEAWAYS

- ARR growth accelerating — Q4 25 net add $13M vs Q1 25 $11M
- Enterprise mix shift improving margin profile — 84% GM on AI module
- NPS 72 is best-ever quarterly reading — onboarding revamp working

Three key metrics in one composite exhibit — ARR at $124M, enterprise at 58%, NPS at 72.
